ufacturing Institutes. All batches of vaccines are tested by the manufacturing institutes before release. However in case of doubt, vaccines are subjected to quality control test at Central Research Institute, Rasauli. The requirements of Measles Vaccine are met through import by UNICEF, as commodity assistance. In addition, UNICEF had also supplied small quantities of DPT & DT vaccines during the year 1985-86 and 1986-87. For vaccines procured through DGS&D the testing procedure prescribed is strictly followed. The vaccine is accepted only after obtaining clearance from the National Quality Control Laboratory of Immunobiologicals, at CRI, Kasauli.

(f) to (h) Vaccines procured from manufacturing institutes are transported in Refrigerated Vans to the nearest airport. The Vaccines are transported by air to State Headquarters or Regional stores. From Regional stores to the District Stores and from PHCs, it is transported in cold boxes which can be carried in jeeps. For outreach areas, vaccine is carried in vaccine-carriers and day-carriers. At the state and Regional Headquarters vaccines are stored in Walk-in-coolers, walk-in Freezers. At the District and PHC levels vaccines are stored in ILRs Cold boxes and Deep-Freezers. Government of India has provided various cold chain equipments for transportation and storage of vaccines DPT, DT, TT & Typhoid are to be kept at 2—8 °c. to avoid loss of potency. Polio and Measles Vaccines are stored at Sub-zero temperatures.

Combination of drugs under Category of Drugs Price Control Order
